

EZGEL PRF: The Future of Natural Aesthetic Rejuvenation

EZGEL PRF (Plasma Rich Fibrin) is the latest advancement in natural, regenerative aesthetics. It offers a bio-stimulating, filler-like effect without synthetic chemicals, using your body's own growth factors to rejuvenate skin, stimulate collagen, and restore volume.

Understanding Undereye Hollows and Dark Circles

1 Thin Skin

The skin under the eyes is the thinnest on the body, making it prone to volume loss and visible blood vessels.

2 Loss of Fat and Collagen

With age, fat pads under the eyes shrink and collagen production decreases, creating a hollow appearance.

3 Weakening Orbital Septum

The orbital septum weakens, leading to a shadow effect that enhances dark circles.

4 Lifestyle Factors

Stress, lack of sleep, and dehydration contribute to a tired, hollow look.

The Science Behind EZGEL PRF

1

Blood Collection

A small amount of your blood is drawn and spun in a specialized centrifuge.

2

Centrifugation

Blood is separated into red blood cells, Platelet-Poor Plasma (PPP), and Platelet-Rich Fibrin (PRF).

3

Heating and Cooling

PRF is heated and cooled to form a gel-like consistency, concentrating platelets and growth factors.

How EZGEL PRF Works Under the Skin

1

Slow-Release Growth Factors

The gel matrix slowly releases growth factors over time, enhancing collagen and elastin production.

2

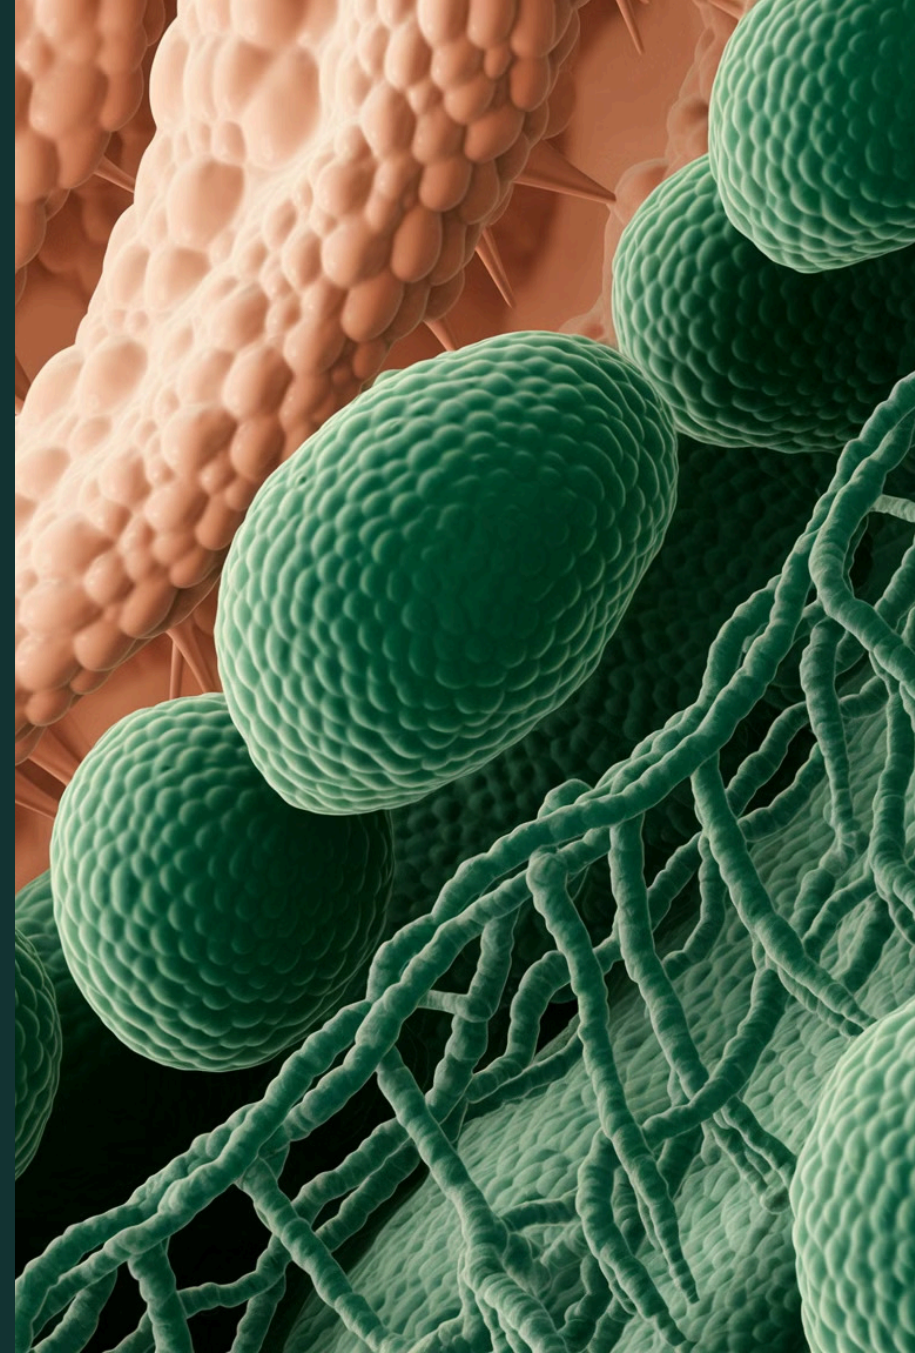

Fibrin Scaffold

The fibrin matrix acts as a scaffold, supporting new tissue growth and cellular regeneration.

3

Collagen Stimulation

By stimulating fibroblasts, it boosts collagen and elastin synthesis, improving volume, elasticity, and firmness.

Key Growth Factors in EZGEL PRF

Growth Factor	Function and Benefits
PDGF	Stimulates cell growth, collagen production, and blood vessel formation
TGF- β	Promotes collagen synthesis and wound healing, enhancing skin firmness
VEGF	Stimulates blood vessel formation, improving circulation and skin vitality
EGF	Promotes cell regeneration, reducing fine lines and wrinkles
IGF	Enhances collagen synthesis, improving elasticity and hydration

EZGEL PRF vs. Traditional Fillers

Natural and Safe

Made from your own blood, eliminating the risk of allergic reactions or foreign body reactions.

Biostimulation

Stimulates collagen production for natural volume restoration, unlike hyaluronic acid fillers that simply add volume.

Long-Lasting Results

Slow release of growth factors provides progressive, long-lasting results that look natural and age gracefully.

Benefits of EZGEL PRF

Restores Volume Naturally

Gradually rebuilds volume with collagen stimulation, maintaining natural facial contours.

Improves Skin Texture

Smooths fine lines and wrinkles by increasing collagen and elastin production.

Enhances Skin Hydration

Growth factors stimulate hyaluronic acid production, enhancing hydration and glow.

Boosts Circulation

Improves blood flow and nutrient delivery, enhancing overall skin health.

Timeline of EZGEL PRF Results

1

Immediate Glow

Clients notice a plumping effect immediately due to the gel matrix.

2

Gradual Improvement

Results become more noticeable at 4-6 weeks as collagen production ramps up.

3

Best Results

Achieved after 2-3 sessions spaced 4-6 weeks apart.

4

Longevity

Results last 6-12 months, depending on age, lifestyle, and treatment area.

EZGEL PRF for Undereye Rejuvenation

No Tyndall Effect

100% natural and translucent, blending seamlessly without any blueish discoloration.

No Migration

Integrates naturally with the tissue, eliminating the risk of migration or swelling.

Natural Collagen Stimulation

Rebuilds the skin's structure naturally, providing gradual, long-term volume restoration.

100% Biocompatible

Made from your own blood, ensuring minimal risk of adverse reactions.

The EZGEL PRF Process

Blood Draw

A small amount of your blood is collected.

Centrifugation

Blood is processed to isolate Platelet-Rich Fibrin (PRF).

Gel Formation

PRF is heated and cooled to create a gel-like consistency.

Injection

The EZGEL PRF is carefully injected into the treatment area.

Why Choose EZGEL PRF for Undereye Rejuvenation

Natural Results

Gradual improvement blends seamlessly with your facial contours.

Minimal Downtime

Low risk of bruising or swelling, as it's 100% natural.

Brightens and Hydrates

Improves hydration and lightens dark circles.

Long-Lasting Effects

Results last 6-12 months with ongoing collagen stimulation.

EZGEL PRF Treatment Plan

1

Initial Treatment

First session to introduce EZGEL PRF and begin collagen stimulation.

2-3

Follow-up Sessions

Spaced 4-6 weeks apart to build on initial results.

6-12

Months of Results

Enjoy improved skin texture, volume, and brightness.

1-2

Annual Maintenance

Yearly treatments to maintain results and prevent future hollowing.

Experience the EZGEL PRF Difference

EZGEL PRF offers a revolutionary approach to undereye rejuvenation. By harnessing your body's natural healing processes, it provides long-lasting, natural-looking results without synthetic chemicals. Experience the future of aesthetic treatments with EZGEL PRF.

A Personal Thank You from Me & My Team

To my incredible clients,

Thank you for trusting **me and my team** with your skin, your confidence, and your journey to feeling your best. Every time you walk through our doors, you're not just a client—you're part of something I've built with passion, integrity, and a deep love for what I do.

I promise to always be honest, to guide you with care, and to deliver results that you'll love—not just today, but for years to come. My team and I are here for you, every step of the way.

With all my gratitude,

Sapana Dhakal

Founder, **ILML Aesthetics**
